

BLIND-BOX PRIZE MERCHANDISER - 1 PLAYER

Star Cube

Pick up the box. Win the surprise.

Star Cube turns a miniature forklift into a one-button prize game. Players time the lift, collect a blind box, and only discover the prize after opening it. The mechanism and full prize wall are visible from across the floor.

ranges

WE DON'T BUILD MACHINES FOR WAREHOUSES.

We build for real arcade floors, real staff routines, and real player decisions.

How it plays

Three steps the player can understand from the cabinet.

1

Move into position

The first press drives the miniature forklift toward the blind-box display.

2

Time the lift

The next press lifts the selected box when the mechanism reaches the right position.

3

Open the surprise

The forklift delivers the box to the player, while the contents remain hidden until opening.

Why it works on the floor

The operating reasons behind the visible cabinet.

01

Visible mechanical novelty

The real moving forklift distinguishes the cabinet from a standard crane or pusher.

02

Simple one-button control

The action is accessible to younger players while timing keeps the result engaging.

03

Full blind-box display

Up to 88 boxes create a strong merchandise wall for passing players.

04

Zone-based settings

Different prize zones can use different win-rate settings to match their merchandise value.

Operator view & specifications

What staff manage, what procurement needs, and what should be confirmed.

DAY-TO-DAY OPERATING POINTS

01 Visible mechanical novelty

The real moving forklift distinguishes the cabinet from a standard crane or pusher.

02 Simple one-button control

The action is accessible to younger players while timing keeps the result engaging.

03 Full blind-box display

Up to 88 boxes create a strong merchandise wall for passing players.

04 Zone-based settings

Different prize zones can use different win-rate settings to match their merchandise value.

CONFIRMED PRODUCT DATA

MACHINE SIZE

D1162 x W888 x H2627 mm

234 kg

POWER

924 W

PLAYERS

1

CAPACITY

88 blind boxes

SMALL BOX

L6-7 x D6-7.5 x H8-12 cm

LARGE BOX

L6-9 x D10-12 x H8-12 cm

SETTINGS

Adjustable by prize zone

PACKING

Carton packing

CERTIFICATION

CE, UKCA

ORDER NOTE

Prize selection is normally localized. Test the exact box samples and confirm loading, lifting, and delivery before production.

Fit the machine to the venue

A useful quote starts with the operating plan, not only the cabinet name.

WHERE IT MAY FIT

- FECs and shopping mall arcades
- Operators with a reliable blind-box supply
- Venues serving children, families, and collectors
- Floors needing a tall, visible merchandise display

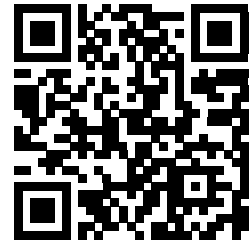

Confirm before production

These details affect setup, prize cost, service access, and shipment planning.

- 1 Exact blind-box dimensions
- 2 Prize mix and value by zone
- 3 Play price and zone settings
- 4 Payment-system interface
- 5 Cabinet height and delivery clearance
